● 1T-LSD

化学名	(8R)-N,N-ジエチル-6-メチル-1-[(チオフェン-2-イル)カルボニル]-9,10-ジデヒドロエルゴリン-8-カルボキシアミド及びその塩類
構造式	 <p>The image shows the chemical structure of 1T-LSD. It features a complex polycyclic core consisting of a benzene ring fused to a six-membered ring, which is further fused to a five-membered ring containing a nitrogen atom. This five-membered ring is substituted with a thienylmethyl group (a five-membered ring with a sulfur atom and a carbonyl group). The six-membered ring is substituted with a methyl group and a piperazine ring. The piperazine ring is further substituted with an N,N-diethylcarbamoyl group. Stereochemistry is indicated with a wedge bond for the hydrogen atom at the 8-position and a dashed bond for the carbonyl group at the 6-position.</p>
